

A photograph of an unrolled scroll on a dark wooden surface. The scroll is made of aged, yellowish-brown paper. In the center of the unrolled portion, the equation  $E_n = h\nu_0\phi^n$  is written in a black, serif font. The equation is enclosed within a decorative, hand-drawn border of golden-brown floral and scrollwork patterns. To the right of the scroll, a single lit candle sits on a small, dark, circular holder. The candle is yellow and has a bright flame, casting a warm, golden light across the scene. The background is dark and out of focus, emphasizing the scroll and the candle.
$$E_n = h\nu_0\phi^n$$
